

### **credit card contract example pdf**

A credit card is a payment card issued to users (cardholders) to enable the cardholder to pay a merchant for goods and services based on the cardholder's promise to the card issuer to pay them for the amounts plus the other agreed charges. The card issuer (usually a bank) creates a revolving account and grants a line of credit to the cardholder, from which the cardholder can borrow money for ...

Adverse Selection in the Credit Card Market Lawrence M. Ausubel \* University of Maryland June 17, 1999  
Abstract Adverse selection is one of the most celebrated phenomena in the economics of information.

### **Adverse Selection in the Credit Card Market - Ausubel**

Credit card interest is the principal way in which credit card issuers generate revenue. A card issuer is a bank or credit union that gives a consumer (the cardholder) a card or account number that can be used with various payees to make payments and borrow money from the bank simultaneously. The bank pays the payee and then charges the cardholder interest over the time the money remains borrowed.
