Debits and credits occur simultaneously in every financial transaction in double-entry bookkeeping. In the accounting equation, $Assets = Liabilities + Equity$, so, if an asset account increases (a debit (left)), then either another asset account must decrease (a credit (right)), or a liability or equity account must increase (a credit (right)). Note also that in the extended equation, revenues ...

Debits and credits - Wikipedia

A bad debt is a monetary amount owed to a creditor that is unlikely to be paid and, or which the creditor is not willing to take action to collect for various reasons, often due to the debtor not having the money to pay, for example due to a company going into liquidation or insolvency. There are various technical definitions of what constitutes a bad debt, depending on accounting conventions ...
