

education administration related occupations pdf

Education is the process of facilitating learning, or the acquisition of knowledge, skills, values, beliefs, and habits. Educational methods include storytelling, discussion, teaching, training, and directed research. Education frequently takes place under the guidance of educators and also learners may also educate themselves. Education can take place in formal or informal settings and any ...

Many of the job openings over the 2012–22 decade are projected to come from the need to replace workers who leave the occupation. However, for the occupations assigned to the health science, human services, and information technology clusters, BLS expects more job openings to come from newly created jobs.

The General Education Development (GED) tests are a group of four subject tests which, when passed, provide certification that the test taker has United States or Canadian high school-level academic skills. It is an alternative to the US High school diploma, HiSET and TASC test. The GED Testing website currently does not refer to the test as anything but "GED".
